

GitHub – How to Revert a commit

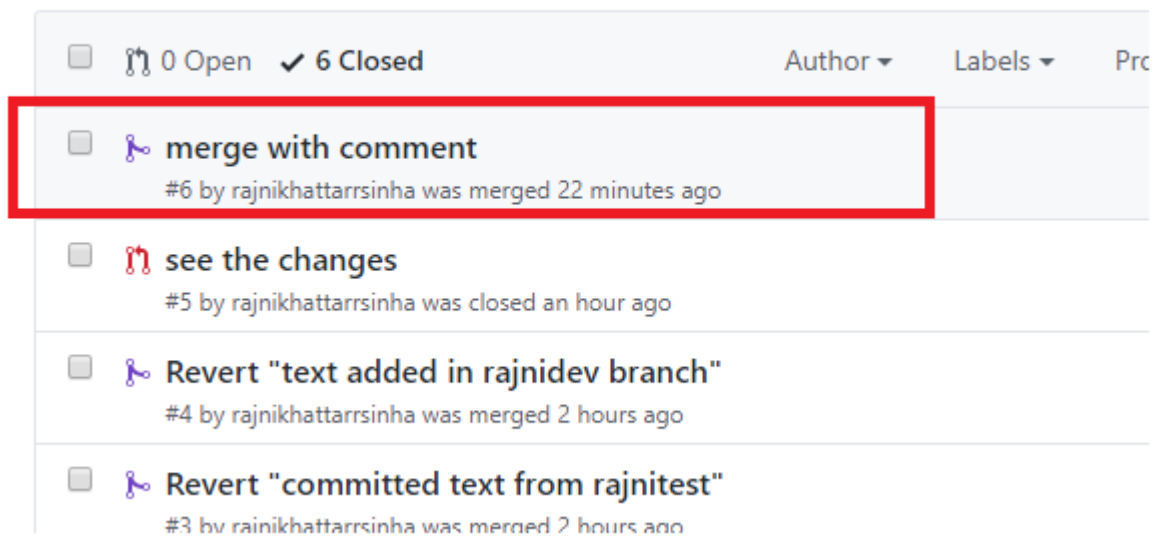

- 1.) Open your repository in GitHub
- 2.) Navigate to Pull Request Tab
- 3.) View the Closed Pull Requests

The screenshot shows the GitHub interface for the repository `rajnikhattarrsinha / repoformultiplecommits`. The `Pull requests` tab is selected and highlighted with an orange border. Below the navigation bar, there is a search bar with the query `is:pr is:closed` and a `Filters` dropdown. A button labeled `Clear current search query, filters, and sorts` is visible. The main content area displays a list of closed pull requests:

<input type="checkbox"/>	0 Open <input checked="" type="checkbox"/> 6 Closed	Author	Labels
<input type="checkbox"/>	merge with comment #6 by rajnikhattarrsinha was merged 22 minutes ago		
<input type="checkbox"/>	see the changes #5 by rajnikhattarrsinha was closed an hour ago		
<input type="checkbox"/>	Revert "text added in rajnidev branch" #4 by rajnikhattarrsinha was merged 2 hours ago		
<input type="checkbox"/>	Revert "committed text from rajnittest" #3 by rajnikhattarrsinha was merged 2 hours ago		
<input type="checkbox"/>	committed text from rainitest		

4.) Click on the link of the merge request

 Clear current search query, filters, and sorts

Pull request successfully merged and closed
You're all set—the `rajnidev` branch can be safely deleted. Delete branch

6.) Create a new pull request and merge into master the same way we merge pull request normally.

This will revert the changes merged through previous Merge Request. We can do this till any previous level/ commit we want to revert.
